PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 8+ years of experience building scalable web applications across FinTech, HealthTech, Analytics, and Open Source. Most recently, I spent nearly a year at PayPal building Buy Now, Pay Later experiences used across multiple markets, collaborating across engineering, product, QA, and operations to deliver reliable customer-facing solutions. I enjoy solving complex problems, building scalable systems, mentoring engineers, and leveraging AI to improve software development and user experiences.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL

Frontend: React, Next.js, Angular, Material UI

Backend: Node.js, Express.js, Spring Boot, Flask

Web Services: REST APIs, GraphQL, Swagger/OpenAPI

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Datadog, Postman, AI-Assisted Development

Testing: Jest, React Testing Library, Cypress, Playwright

Databases: PostgreSQL, MongoDB, Firebase, BigQuery

PROFESSIONAL EXPERIENCE

PAYPAL, Austin, TX (Hybrid) — Full Stack Software Engineer | Oct 2025 – Jul 2026

- **Owned critical production workflows** for PayPal's New-To-PayPal (NTPP) onboarding experience during the U.S. rollout, partnering with Product and Operations to resolve customer-impacting issues and maintain launch stability.
- **Assumed sole engineering ownership** of the NTPP Spinwheel prefill experience post-launch, leading production support, incident resolution, stakeholder communication, and continuous platform improvements.
- **Engineered full-stack Open Banking capabilities** using React, TypeScript, Node.js, Express, and GraphQL for Nova Credit integrations supporting Pay in 4 and Pay Monthly products.
- **Developed and enhanced customer-facing experiences** across PayPal's Buy Now, Pay Later platform, including onboarding, checkout, and credit decisioning flows.
- **Diagnosed and resolved production issues** using Datadog RUM and distributed tracing, accelerating root-cause analysis across complex frontend and backend flows.
- **Led production release coordination** across frontend and backend services, partnering with QA and engineering teams on deployment validation, health monitoring, hotfixes, and rollback decisions.
- **Applied AI-assisted development tools** to accelerate delivery, strengthen code quality, streamline peer reviews, and improve debugging, documentation, and production investigations.

Technologies: React, TypeScript, Node.js, Express.js, GraphQL, REST APIs, Microservices, Datadog (RUM & Distributed Tracing), Postman.

SKYE, New York, NY (Remote) — Senior Software Developer | May 2024 – Oct 2024

- **Developed full-stack scheduling, analytics, and reporting solutions** using React, Next.js, Node.js, Material UI, and Recharts, improving operational visibility and user experience.
- **Increased automated test coverage to approximately 90%**, improving release confidence and reducing regressions across critical customer workflows.

- **Collaborated closely with engineering, product, and design leadership** to deliver scalable, intuitive features while optimizing backend services and reporting performance.

Technologies: React, Node.js, Next.js, Material UI, Recharts, Firestore, SQL, BigQuery, GitHub Actions, Jest.

SIGMA360, New York, NY (Remote) — Software Engineer → Senior Software Engineer | Oct 2018 – Apr 2024

- **Helped scale Sigma360's enterprise risk platform** as one of the early frontend engineers, supporting global financial institutions including Stripe and Barclays.
- **Built analytics dashboards and investigation tools** using React, TypeScript, Ant Design, ChartJS, and React PDF, reducing analyst investigation time by 35%.
- **Led a graph visualization proof of concept** using Cytoscape and Neo4j to improve risk investigation workflows while avoiding costly proprietary visualization tools.
- **Built reusable React component libraries and frontend frameworks** adopted across multiple applications, improving consistency and accelerating feature delivery.

Technologies: JavaScript, TypeScript, React, Redux, Zustand, TanStack Query, Ant Design, ChartJS, React PDF, Cytoscape, Neo4j, SASS, Google Analytics

ANDELA UGANDA LIMITED, Kampala, Uganda — Software Engineer | Dec 2017 – Sep 2018

Developed full-stack web applications using Python, Flask, Django, React, and JavaScript while collaborating with distributed Agile engineering teams across development, testing, code reviews, and production deployments.

Technologies: Python, Flask, Django, React, JavaScript, HTML, CSS, REST APIs, Git, Agile

OPENMRS / OHRI / METS — Senior Software Engineer & Open Source Contributor | Nov 2020 – Aug 2023

Built reusable React and TypeScript frameworks for clinical applications, **reducing code duplication by 90%** and accelerating customization. Developed schema validation and drag-and-drop capabilities for a clinical form builder, **reducing form creation time by 40%**, and enhanced UgandaEMR stock management, **reducing stock-related issues by 50%** while contributing to global healthcare implementations.

Technologies: React, TypeScript, Angular, Java, JSON Schema, Micro-Frontends, Webpack Module Federation, Carbon Design, Formik, SWR, React Ace

PROJECTS

eClinician — React, Spring Boot, PostgreSQL, Docker

Multi-tenant electronic health records platform featuring patient management, appointments, medical records, prescriptions, reporting, and AI-assisted clinical workflows.

Kids Learning App — React Native, React, TypeScript, AWS

Interactive educational platform for children featuring quizzes, stories, and learning challenges backed by serverless AWS services.

MixedTrips — Next.js, TypeScript, Node.js, PostgreSQL, Stripe, PayPal

Travel booking platform supporting trip planning, online payments, and booking management.

EDUCATION

Master of Science in Computer Science — Maharishi International University, USA

Bachelor of Science in Computer Engineering — Busitema University, Uganda
